

The Solution to Educational Campus Transportation is autonomous golf cart fleets

Why go autonomous?

Transportation is headed towards the future. Campuses are no longer bound by the constraints of manned vehicles and physical drivers. Now, smarter self-driving fleets can make on-site transportation more efficient, reliable, cost-effective, and productive for students, educators, visitors, and staff.

The benefits of autonomous golf carts

- Huge “WOW” factor for students and parents
- Massive cost savings for the institution
- Safer and more reliable transport for students, staff, and visitors
- Lower insurance costs due to fewer accidents
- Simplified and smarter fleet management
- 24/7 availability on campus
- Sharing allows everyone to get around more efficiently
- An accurate estimated time of arrival lets everyone arrive on time
- Powerful reservation features for scheduled appointments and classes
- Easy in-cart point of interest selection
