Smarter Hotel and Resort Transportation
is autonomous golf cart fleets

Why go autonomous?

Transportation is headed towards the future. Organizations are no longer bound by the constraints of manned vehicles and physical drivers. Now, smarter self-driving fleets can make on-site transportation more efficient, reliable, cost effective, and fun for the user/guest.

The benefits of autonomous golf carts

- Huge "WOW" factor for guests
- Massive cost savings for hotels
- Safer and more reliable transport for guests
- Accident prevention will save you significant spare parts, down time, and injuries
- With smart cart allocation, batteries will last all day - extending their lifecycle
- Simplified and smarter golf cart management
- 24/7 availability for guests and teams
- Accurate estimated time of arrival
- Powerful reservation features
- Exciting in-cart point of interest selection features
